

Mirgor

 Argentina

 3.400+ employees

 Manufacturing Industry

Grupo Mirgor is a leading company in the automotive parts industry that has diversified into eight business units, covering manufacturing, retail, supply chain, agriculture, innovation, global operations, distribution, and services.

35% less time in analysis and decision-making

85% of assets reporting in the cloud in 3 months

80% reduction in operational tasks

Case Study

Mirgor saves 2.500 hours of manual work a year with InvGate

Challenge

Asset Management relied on Excel, which generated inefficiencies and lacked visibility. The team dedicated **40% of its time** to error-prone spreadsheets, losing more than **2,500 annual hours in manual data entry**. Additionally, the **lack of control** over the asset lifecycle delayed key strategic decisions.

Solution

- ✓ **Custom dashboards**
 Created six personalized dashboards to analyze key data, improve information visualization, and facilitate strategic decision-making.
- ✓ **Automations**
 Configuration of 40 automations, including dynamic relocation assignments in more than 15 countries and alerts about the expiration of 30 contracts.

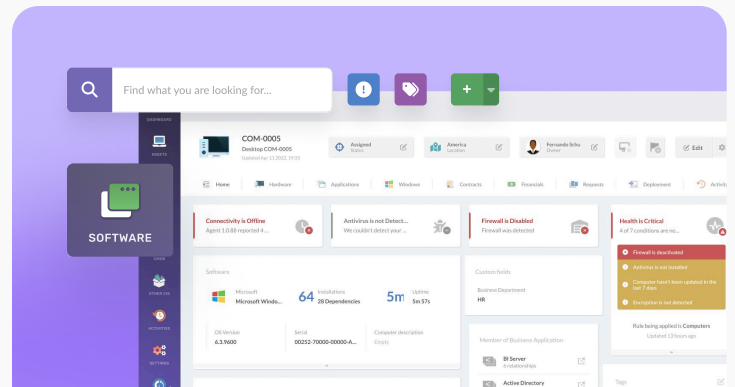

- ✓ **Smart tags**
 Smart tags allowed them to categorize assets dynamically and automatically, improving their search and tracking throughout their life cycle.
- ✓ **Integrations**
 MS Intune and Jira Service Management to optimize processes and improve device and Service Management.
- ✓ **Inventory**
 Automated registration of 3,500 assets with the InvGate Agent and csv batch import.

The role of ORKOS in the implementation

Orkos played a crucial role in the implementation's success, providing continuous support, quickly resolving technical challenges, and optimizing the solution to meet Mirgor's objectives.

"They stand out for being close to the client. They're a provider we recommend because working with them is excellent." Mirgor about Orkos.

"InvGate allowed us to unify the management of all our IT assets, optimizing our daily operations and giving us precise visibility. It has been a paradigm shift that has helped us make more agile, strategic decisions".

Ayelen Rodríguez
 Head of Support and Microinformatics, Mirgor
